As Lean thinking has matured there has been a host of simulations in the market place, some which are basic (e.g. The 5S numbers game) to some which are a bit more complicated (e.g. The Plug Game). However Lean simulations for the service sector need to be fit for purpose. Many of the current simulations are manufacturing based and still used in service industries. Even the ones that claim to be " service " are based on more administrative/support activities rather than a full end-to-end ...
